Commercial Pool Models

Copper or copper/silver ionization system with all new state-of-the-art technology. Over 200 precise settings. LED readout display. System releases precise amounts of safe, natural minerals into the water to help control algae, bacteria & viruses in the water. Enables commercial pool operators to lower chlorine use up to 75%. Provides long-term, nontoxic residual protection. Amazing water clarity. All units are supplied with schedule 80, 3" flow-cell tees and electrodes unless specified. 4" is also available.

CS-75

- Handles up to 75,000 gallons pools
- Digital readouts with 200 precise settings
- Includes test kit & one 6" electrode
- Includes one regular schedule 80 tee
- NSF, UL, CUL listed
